

ENTRO 1 HARNESS

The Entro 1 Harness is designed for use as a fall protection harness and for access to reactors, with life support equipment. Featuring a padded shoulder yolk which allows breathing hoses to be routed to minimise strain on the head. It comes with a rear attachment D ring and front attachment loops. Made from a superior polyester webbing, and standard rectangular connectors to prevent clogging from dirt.

The harness is approved to Approved to EN361:2002.

Part No: 10058

Supporting Life in Hazardous Environments
