FLOWMASTER™ FRESH AIR BREATHING APPARATUS

FLOWMASTER™

FLOWMASTER™ FRESH AIR BREATHING APPARATUS

Fall Protection Harness

- EN361 approved harness with strain relief attached to hose
- Perfect for excavation work

Basic Waistbelt

Approved with Luno FlowmasterMask for:

- Excellent field of view
- Superior user comfort
- 5 point adjustable harness

Optional Quick Connect Hose Connections

The Flowmaster fresh air breathing apparatus system is designed to provide a constant flow of fresh air to users working in environments where the air may be unsafe, but can be drawn from a nearby source to supply users with safe air.

The Flowmaster range offers several options to ensure that users can use the best suited equipment to their specific requirements giving the option of battery powered assisted options through to unassisted.

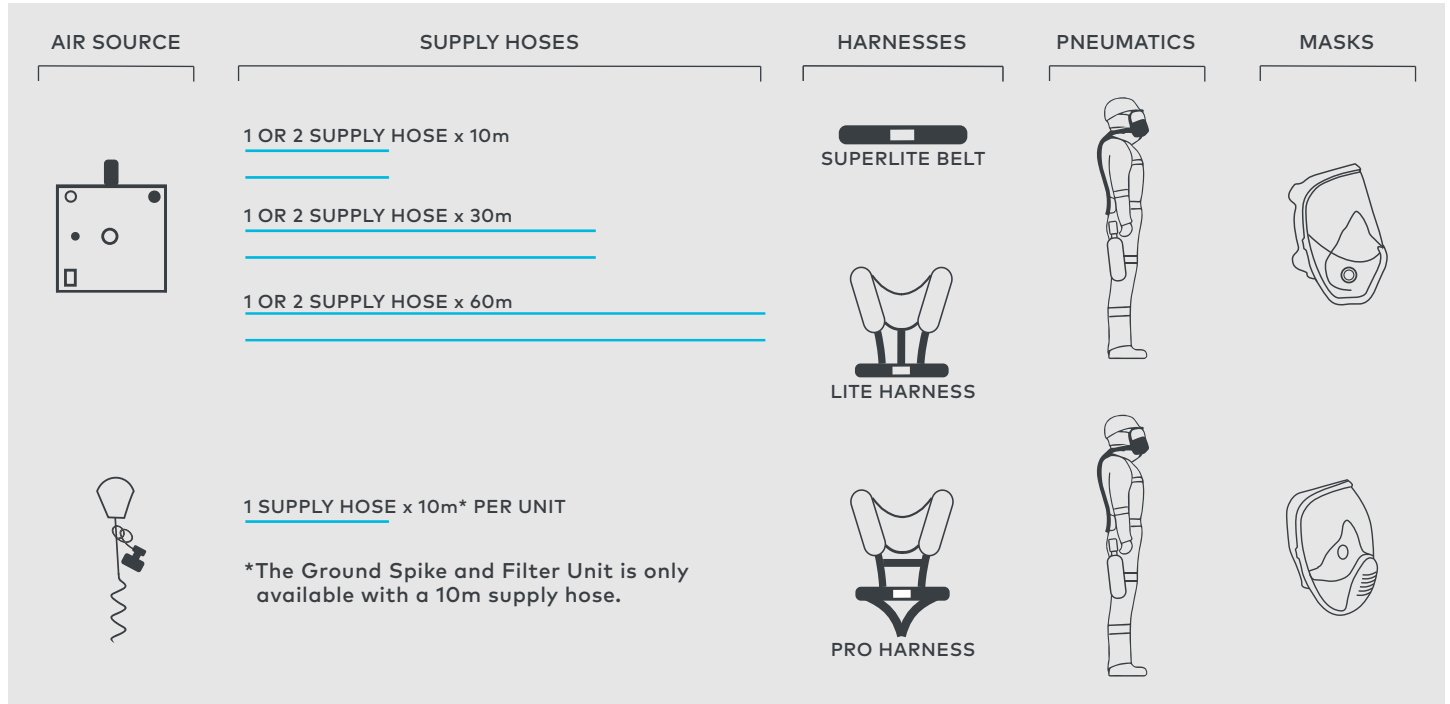

The range leading Flowmaster 2 integrates a re-chargeable battery and alarms to ensure that users can work free from trailing leads, but are warned of low battery condition, blocked pre-filters or other issues with the unit.

A range of harness options ensures that users can select the most comfortable and appropriate option for their work environment with the inclusion of a EN361 approved option for excavation related tasks, as well a full body comfort harness for long duration tasks where users need to work comfortably.

FLOWMASTER™ FRESH AIR BREATHING APPARATUS

Typical Configuration Options

AIR SOURCE

20500	FLOWMASTER 1 BLOWER UNIT
20535	FLOWMASTER UNASSISTED

APPARATUS
