HEAVY DUTY BREATHING AIR HOSE LSBAH001

HEAVY DUTY BREATHING AIR HOSE LSBAH001

The Luno Systems heavy duty breathing air hose is designed for work in high risk working such as tank cleaning, where there are highly contaminated environments.

Featuring good resistance to most hydrocarbons and chemicals, excellent crush and kink resistance, this hose is selected for its durability in heavy industrial environments. Typical applications include tank cleaning and mechanical works where there is heavy contamination.

SPECIFICATION	LSBAH001
Lengths	25, 50 , 90, or 100 Metres
Material & Construction	Reinforced braided PVC
EN Standard Conformity	EN14593-1, EN14594
Chemical Resistance	Most fuels, oils greases, solvents (see chemical resistance data)
Size	19mm external, 8mm bore
Flexibility	Medium
Min. Bend Radius	220mm
Nominal Weight	400g/m
Operating Temp.	-20 to +50°C
Colour	Red (other colours available on request)
Terminations	Luno stainless barbed tail and ferule with CEJN Breathing couplings
Antistatic Properties	Yes

- To specify hose length when ordering, use part no. together with required length (e.g., LSBAH001-50M = Heavy Duty Red Breathing Air Hose, length = 50m)
