PREMIUM POLYURETHANE BREATHING AIR HOSE LSBAH003

PREMIUM POLYURETHANE BREATHING AIR HOSE LSBAH003

The Luno Systems Polyurethane breathing air hose is designed for work in high risk working such as tank cleaning, where there are highly contaminated environments.

Enhanced chemical and heat resistance with good flexibility at all temperatures are all features which make this a premium level breathing air hose. The hose is used on Luno life support systems, where breathing hose integrity is especially critical.

| SPECIFICATION | LSBAH003 |
|-------------------------|---|
| Lengths | 25, 50 , 90, or 100 Metres |
| Material & Construction | Polyurethane, braided reinforced |
| EN Standard Conformity | EN14593-1, EN14594 |
| Chemical Resistance | Most fuels, oils greases, solvents (see chemical resistance data) |
| Size | 14mm external, 8mm bore |
| Flexibility | High |
| Min. Bend Radius | 130mm |
| Nominal Weight | 100g/m |
| Operating Temp. | -20 to +60°C |
| Colour | Orange (other colours available on request) |
| Terminations | Luno stainless barbed tail and ferule with CEJN Breathing couplings |
| Antistatic Properties | Yes |

- To specify hose length when ordering, use part no. together with required length (e.g., LSBAH003-50M = Premium Orange Breathing Air Hose, length = 50m)
