

# LUNO SYSTEMS ANNOUNCES STRATEGIC PARTNERSHIP WITH FAJER FIRE & SAFETY TECHNOLOGIES

We are happy to announce that Luno Systems Limited and Fajer Fire & Safety Technologies have mutually agreed a strategic partnership for KSA & Bahrain.

The goal of this partnership is to bring products, services and knowledge in service of industries such as Oil & Gas, Onshore & Offshore Rigs Operations, Petrochemical Refineries, Heavy Industries, Chemical Companies etc.

Luno Systems is a manufacturer of life support systems and associated equipment for work in high risk environments. Luno Systems are dedicated to life support systems and breathing air solutions for work in areas immediately dangerous to life and health (IDLH). From breathing air helmets with built-in communications and harnesses for reactor inert entry to breathing air cylinder trailers and compressor systems for tank cleaning work, we are passionate about supporting clients working in some of the most hazardous work environments today.

FFAST – Fajer Fire and Safety Technologies provides the complete health & safety solution for upstream, downstream, midstream needs. With the thorough knowledge and deep understanding of our clients and their nature of business in Oil & Gas, Onshore & Offshore Rigs Operations, Petrochemical Refineries, Heavy Industries, Chemical Companies etc. Fajer Fire and Safety Technologies provides an integrated solution to cater their safety requirements and proactively take part in understanding the complexities & criticalities of business or job and the risk present in it and package a solution specifically to meet requirement and exceed the expectation of the clients.

Our principal goal is to satisfy the customer's need for reliable tailor-made for their safety, solutions that they can trust, by providing our best services. This partnership will surely help us enhance and enrich our business and also provide state of art products and services.
